Dear Parents and Carers

At The Brunts Academy, we remain committed to providing our pupils with the very best educational experiences - experiences that spark curiosity, build confidence, and prepare them for the opportunities of tomorrow. Our team works tirelessly to create a learning environment where every child feels inspired, supported, and excited to learn.

One of the areas we are particularly proud of is our technology curriculum. Whether it's design, robotics, practical engineering or food and hospitality, these projects offer pupils hands-on, real-world learning that builds vital skills for the future. However, as with many schools across the country, we are currently facing significant financial pressures. Rising costs of materials and resources are making it increasingly difficult to sustain the high-quality, immersive projects that our pupils enjoy and deserve.

Despite these challenges, we remain determined to continue offering a curriculum that is rich, relevant, and engaging.

To help us continue delivering these valuable experiences, we are reaching out to ask for your support. If you feel able to, we would be incredibly grateful for a donation via **ParentPay** to cover the cost of the DT and Textiles project for your child's year group, which will be £8 for year 8. Every contribution, however large or small, makes a real difference in ensuring our pupils have access to the best resources possible.

This payment doesn't cover Food Technology ingredients; these will need to be provided from home during the term your child is due to do Food Technology. Should you need support with this, we can help. Just ask your child to have a conversation with their Food Technology teacher in advance of their practical lessons.

As always, we thank you for your continued support and partnership in our Academy improvement journey. Together, we are building something truly special for our children.

With very best wishes

A. Emery
